

CHECK POINT

EXPOSURE MANAGEMENT

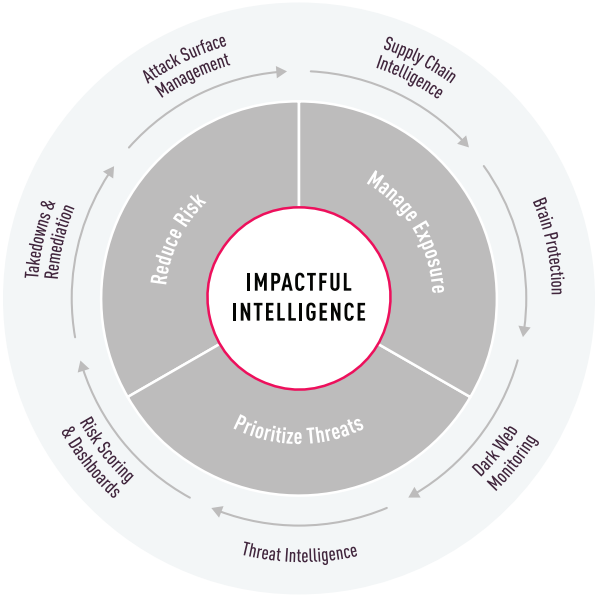

Threat Intelligence

YOU DESERVE THE BEST SECURITY

Check Point Intelligence continuously detects and mitigates a broad range of external cyber threats. With a focus on impactful intelligence and efficiency, Check Point Exposure Management saves your team time and helps you mitigate external cyber risks before they develop into costly incidents.

KEY BENEFITS

- Continuously monitor, detect, prioritize, and mitigate a wide array of external cyber risks.
- Gain visibility on exposures in your attack surface as well as relevant threats on the deep and dark web.
- Protect your organization, brands, domains, and executives against malicious impersonation attacks.
- Support your team with managed services from Cyberint's nation-state levelcybersecurity experts.
- Maximize security spend with a low-touch platform engineered for efficiency and simplicity of use.
- Consume alerts in the platform or within your existing security stack via integrations and REST APIs.

Challenge:

By combining threat intelligence, deep and dark web monitoring, external attack surface management, brand protection, and supply chain intelligence into a single holistic solution, Infinity ERM provides protection against a broad scope of external cyber risks while maintaining a low total cost of ownership and ensuring substantial value.

93% | of alerts identify relevant, true positive threats

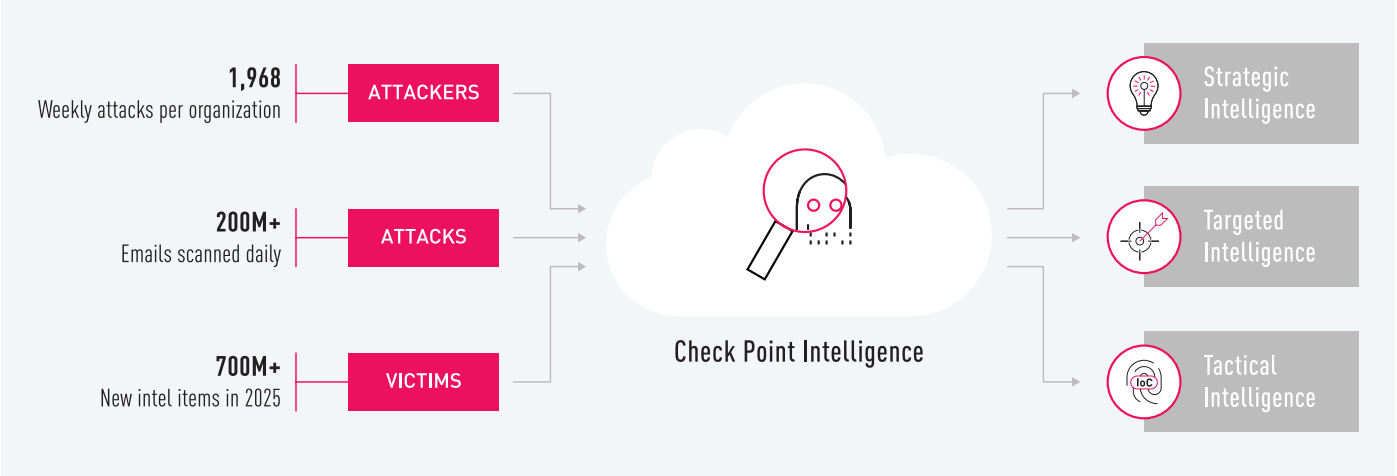

55M | intelligence items collected every month

98% | takedown success rate over the past 10 quarters

Unified External Cyber Risk Management:

Check Point Exposure Management is a comprehensive solution for continuously detecting, managing, and mitigating external cyber threats, helping to reduce risk and prevent breaches.

A Unified Solution Covering the Full CTEM cycle: Intelligence-led, Remediation-driven

Turn Exposure Insight into Continuous Risk Reduction

Combine threat intelligence, vulnerability prioritization, and safe remediation into a single operational loop so exposures are identified, validated, and closed before attackers can exploit them.

See What Attackers Are Targeting Right Now

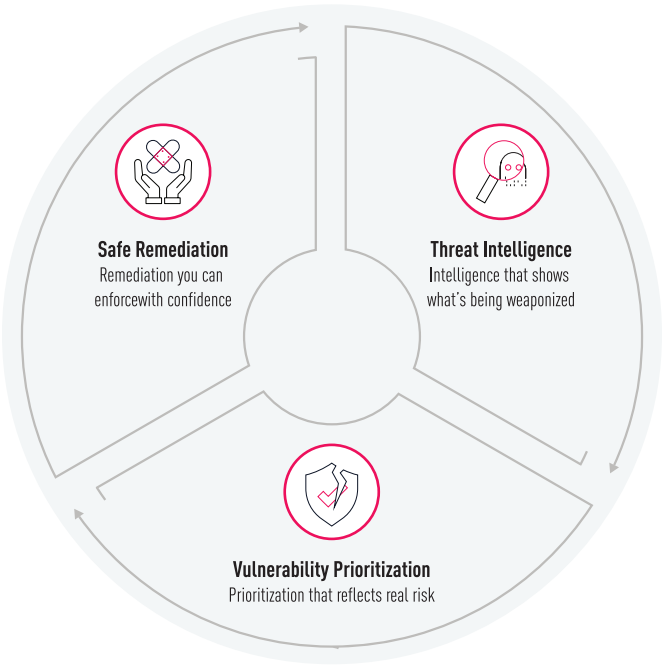

Understand which threats pose immediate risk to your business by mapping active attacker behavior directly to your environment.

Prioritize Exposures That Reduce Risk

Correlate exploitability, reachability, threat activity, and business impact to guide smarter remediation decisions.

Fix Exposures Without Breaking the Business

Automatically validate and then safely enforce remediation across your security stack without disrupting uptime or operations.

Recognition as an Industry Leader from Trusted Analysts

About Check Point Software Technologies Ltd.

Check Point Software Technologies Ltd. (www.checkpoint.com) is a leading protector of digital trust, utilizing AI-powered cyber security solutions to safeguard over 100,000 organizations globally. Through its Infinity Platform and an open garden ecosystem, Check Point's prevention-first approach delivers industryleading security efficacy while reducing risk. Employing a hybrid mesh network architecture with SASE at its core, the Infinity Platform unifies the management of on-premises, cloud, and workspace environments to offer flexibility, simplicity and scale for enterprises and service providers.
